

Express Course: Tables and Graphs in IBM SPSS Statistics

This two-hour course will introduce attendees to tables and graphs in IBM SPSS Statistics. The course will cover types of data and how these are summarized in tables and graphs, using Custom Tables, the Chart Builder, and editing output. Finally, the automation of tables and graphs will be reviewed.

This course will cover the following topics:

- Types of data
- Running tables
- Editing output
- Custom tables
- Statistical tests in custom tables
- Using the Chart Builder
- Running a chart and editing output
- Examples of graphs for statistical tests
- Automation

Course attendees will receive sample data files and step-by-step exercises that can be completed following the course.
