

# Automated Data Preparation

Tech Tips - IBM SPSS Modeler

The six stages of the AI lifecycle

**80% of time**  
**Data Acquisition**  
**Data Understanding**  
**Data Preparation (ADP)**

# What is the ADP Node?

- Automated Data Preparation (ADP) is a tool that helps you prepare data for analysis.
- Located on the Field Operations palette.
- It can automatically analyse your data, fix issues, remove problematic fields, and create new attributes when needed.
- You can use ADP in an automated fashion or review changes and approve.
- Using ADP speeds up model building and scoring, and it makes automated modelling processes more robust.

# Thank You
